Hi Samantha,

As I mentioned at the staff meeting this week, HQ would like us to reach out to the communities that have commercial sterilizers near them. I will be reaching out to the states next week, but we might need your help gathering contacts because in October we will be expected to present whatever information we have to these communities.

Thanks, Cristina

Cristina Fernández, Director  
Air & Radiation Division (3AD00)

**Subject:** UPDATE: R3: EtO Files for ADDs

Several facility names & locations associated with the EtO risk and demographic analysis results in the files sent out yesterday were incorrect. This occurred due to the way the results files were merged with facility name & location information. Attached is the corrected file for your Region. The file provides facility-specific risk results for each EtO commercial sterilizer in your Region, including summary results of the demographic analyses. The risk and demographic analysis results did not change; the correct facility name & location is now associated with the results. If your staff have questions about the results, modeling, or underlying data, please have them contact Amy Vasu for assistance and/or bring their questions to the meeting with your office that is being scheduled in the September 9th-16th timeframe.

Cristina / Carol,

As a follow-up to the special purpose call on EtO today, attached are: 1) the slides from the meeting, and 2) facility specific risk results for each EtO commercial sterilizer in your Region, including summary results of the demographic analyses.

We will be discussing the analyses and overall findings in a little more detail at the Thursday, September 2<sup>nd</sup> EtO Coordination meeting. In addition, OAQPS will be offering individual meetings during the Sept 8<sup>th</sup> -16<sup>th</sup> for technical discussions about the risk results and to answer questions about the emissions or other facility details. **Please sign up for a slot** (first come first choice) **using this [Sign-Up Spreadsheet](#)**.

Let us know if you have any questions or comments.

POCs = Amy Vasu (EtO) / Jenny Noonan and Kristin Bremer (Communications) / Madeline Beal (Risk Communications)

Justin
